Message from the Symposium Chairs

It may be said that modern information technology rests on three technology pillars: semiconductor technology, communications technology, and information processing technology. During the past two decades there have been tremendous advances in all three pillars and their unrelenting convergence that have brought us significantly closer to the realization of the long-envisioned dream of an information society in which anyone can access the cumulative knowledge of the mankind inexpensively from anywhere at any time, namely that of a ubiquitous information age.

The 2009 International Symposium on Information Processing (ISIP 2009) is Co-sponsored by Jiaxing University, China, Peoples' Friendship University of Russia, Russia, Nanchang HangKong University, China, Sichuan University, China, Hunan Agricultural University, China, National Chung Hsing University, Taiwan, Guangdong University of Business Studies, China, Academy Publisher of Finland, Finland. We would like to thank the endless hours of volunteers spent to create the high quality program. We received above 357 submissions, each paper was reviewed by three program committee members, and 170 were selected as regular papers, representing a 48% acceptance rate for regular papers. From these 170 research papers, through two rounds of reviewing, the guest editors selected 59 papers as the Excellent papers will be published by the special issues on Journal of Computers (EI Compendex, ISSN 1796-203X), Journal of software (EI Compendex, ISSN 1796-217X), Journal of Multimedia (EI Compendex, ISSN 1796-2048), Journal of Networks (EI Compendex, ISSN 1796-2056)

The goal of ISIP 2009 is to bring together researchers and practitioners from academia, industry, and government to exchange their research ideas and results, and to discuss the state of the art in the areas of the Security for electronic commerce. Participants of the Symposium will hear from renowned keynote speakers including: IEEE Fellow Prof. Jun Wang, Chinese University of Hong Kong, Hong Kong; Prof. Limin Sun, Institute of Software, Chinese Academy of Sciences, China.

We are particularly grateful to Prof. Jun Wang and Prof. Limin Sun for accepting our invitation to deliver invited talks at this year's conference. We wish to thank the Jiaxing University, China for providing the venue to host the conference. We wish to express our deepest thanks to the members of the Program Committee, who gave their personal free time to perform the often thankless job of reviewing many papers under extremely short deadlines, and to the volunteers and local assistants who made this program a success.

We wish each of you successful deliberations, stimulating discussions, building new friendships and most important of all enjoy your visit to Huangshan, China. We are looking forward to seeing all of you next year at the ISIP 2010.
